This is to confirm that **Eurosafe Solutions Ltd** are an approved THSS installer of Kalzip Access Systems, including Kalzip walkway products and fall arrest products.

Kalzip Walkways and Height Safety Products are supplied only through our network of approved THSS, as they have completed specific training with Kalzip and Latchways in the installation of height safety products onto Kalzip Standing Seam systems. Approved THSS are also fully approved by Latchways for the installation of the Kalzip Fall Arrest system

Kalzip can also confirm that there is only one Fall Arrest system that has been tested and approved for use with Kalzip, the Latchways ManSafe® System.

Substitution of an alternative system will bring into question the validity of a Kalzip guarantee. The method of fixing the Constant Force® post via the Kalzip bracketary ensures that the performance of the Kalzip sheet and patented clip are harmonised.

As such, we have no knowledge as to how an alternative system will perform on a Kalzip roof.

Yours faithfully,
Colin Grainger
Estimator - Kalzip Associated Products
